OUR STORY

In the sixties, C & H Welding was contracted to manufacture the very first aluminum portable batting cage based on a design from the hitting coach with the Pittsburgh Pirates in Bradenton, FL. For over four decades and two generations our family has provided professional baseball products to our industry.

C & H Baseball has adapted, modified, manufactured and distributed portable batting cages and aluminum field equipment throughout the world. Since our company began manufacturing sports equipment we have introduced five different styles of portable batting cages and multiple styles of fielding screens to meet the needs as well as budgets of professional, college, high school and junior programs as well as individuals.

In the nineties, C & H Welding became known as C & H Baseball. C & H Baseball began to offer professional design/build, engineering and installation services. We have provided our services and products to as many as 400 stadium projects since 1996. C & H Baseball installed the first Spectra/Dyneema backstop at Turner Field in Atlanta bringing the first Spectra/Dyneema netting backstop to the baseball industry working through the night by the lights of our trucks so that the team could have their completed new stadium for the opening game the next day.

Today, C & H Baseball continues that commitment to excellence. Our company has become the industry leader in stadium projects from engineering, design/build, design consultation, manufacturing products to the final step installation. We supply professional quality products either manufactured by our team or as dealer's for other quality manufacturers. Our product line offerings include fielding screens, portable batting cages, netting, backstop netting systems, barrier netting systems, Batting tunnel structures, wall padding, equipment padding, and artificial turf.

For nearly fifty years our success has been based on the principle of providing unsurpassed customer service and quality products at reasonable prices. Our customer list speaks for our quality and we are grateful and thankful to all of our customers. C & H Baseball listens to you and we continue to research and develop new products, efficient installation methods and innovative designs. Our goal is 100% customer satisfaction. We look forward to working with you and your teams.

Sincerely,

Danielle Day Huff and Rob Huff

“ We have teams from all over the world at our complex every day. With a world class facility, there is no other choice than C&H Baseball's consistent quality and great looking equipment.”

Rick Braun
 Disney's Wide World of Sports

Professional Cage Models: The Original Since 1968

Features:

C & H Baseball cages are used throughout the major and minor leagues and have set the standard for PROFESSIONAL quality within the industry. 29 Major League teams have chosen C & H Baseball as their portable batting cage provider for their home stadiums. You'll also find C & H Baseball cages in 26 spring training sites, throughout minor league ballparks, colleges and high schools. You will even find C & H Baseball cages in Australia, Italy, Puerto Rico, The Dominican Republic, Belgium, Canada, Panama, Czech Republic and Asia!

All of our Professional batting cages have the following quality features:

- Welded Construction with Stainless Steel Fasteners
- 2" schedule 40 aluminum pipe frame
- Netting is typically #36 knotted heavy duty nylon; 1 $\frac{3}{4}$ " square mesh, UV resistant, with a poly roped border. Heavier nets are available upon request!
- Large wheel & automatic brake means:
 - Reduced turf damage
 - Mobility – One person can maneuver
 - 18" Golf cart tires

2" schedule 40 aluminum pipe frame 2.375" O.D. – 2.067" I.D.

Close-up of wheel system | MIS910

PORTABLE BATTING CAGES

a. NON-FOLDING PROFESSIONAL CAGE | ITEM #CAG100

- 18' wide x 14' 6" deep x 10' high • Use when storage is not a problem • #1 choice for spring training camps

Accessories: CAG100P Full cage padding 9"; VBS100 Unpadded wrap around ballstop; VBS110 Padded wrap around ballstop

b. LARGE FOLDING PROFESSIONAL | ITEM #CAG200

- 18' wide x 22' deep x 12' 6" high • Folds for storage • #1 choice of major league stadiums

Accessories: CAG200P Full cage padding 9"; VBS200 Unpadded wrap around ballstop; VBS210 Padded wrap around ballstop

c. SMALL FOLDING PROFESSIONAL | ITEM #CAG300

- 18' wide x 16' deep x 11' 6" high • Folds for storage • Ideal for areas with low overhead clearance

Accessories: CAG300P Full cage padding 9"; VBS300 Unpadded wrap around ballstop; VBS310 Padded wrap around ballstop

d. NON-FOLDING CLASSIC CAGE | ITEM #CAG400

- 18' wide x 14' 6" deep x 10' high • Same size as "The Professional Cage" • 1.9" o.d. pipe frame

Accessories: CAG400P Full cage padding 8"; VBS400 Unpadded wrap around ballstop; VBS410 Padded wrap around ballstop

Features:

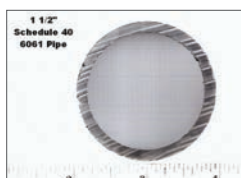

The C & H Baseball CLASSIC line of portable batting cages are manufactured with the same high quality as the PROFESSIONAL line; only the pipe size is different. We use a 1 ½" Schedule 40 Aluminum Pipe, with the same #36 knotted nylon netting as the PROFESSIONAL line. These cages are designed for teams that don't have a major league budget – but still want to invest in a high quality portable batting cage. We have a non-folding and a folding cage option.

“ We are pleased to align ourselves with a fine company that understands the reason why America's pastime is so important to the youth of this great nation. ”

Darrell Miller
Sr. Director, Urban Youth Academy

#36 knotted nylon netting - UV Treated

1 ½" schedule 40 aluminum pipe 1.9" O.D.

CAGE PADDING FOR ALL BUDGETS AVAILABLE

For more on Cage Padding, please see "Equipment Padding" on page 6.

#1 Added Feature!

BATTING CAGES / CAGE ACCESSORIES

e. SMALL FOLDING CLASSIC CAGE | ITEM #CAG500

- 18' wide x 16' deep x 11' 6" high • Folds for Storage • 1.9" o.d. pipe frame
- Accessories: CAG500P Full cage padding 8"; VBS400 Unpadded wrap around ballstop; VBS310 Padded wrap around ballstop

f. OBSERVATION PLATFORM | ITEM #MIS500 (ONE SIDE) | ITEM #MIS510 (BOTH SIDES OF CAGE)

Elevated platform attaches to the batting cage so coaches can observe batting techniques from a different angle. Folds into the cage for easy storage!

g. COACH'S OBSERVATION BENCH | ITEM #MIS300

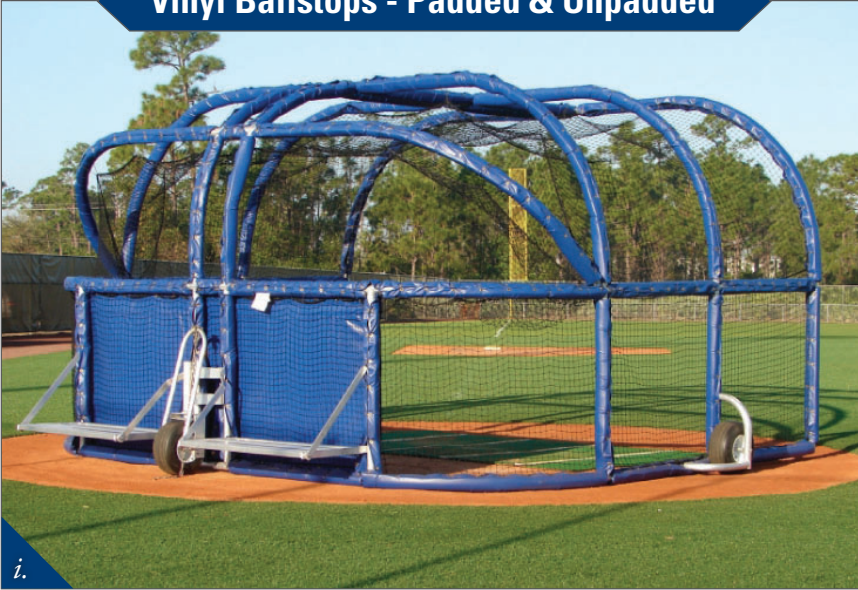

Unique, portable unit that sits behind the batting cage and provides a whole new vantage point for coaches and trainers.

e. ALL SWIVEL WHEELS | ITEM #MIS600

Allows the cage to be moved in any direction. Useful for narrow gates.

h. LOOK & LEAN BARS | ITEM #MIS700 | Coaches can lean on the cage while watching batting practice.

Vinyl Ballstops - Padded & Unpadded

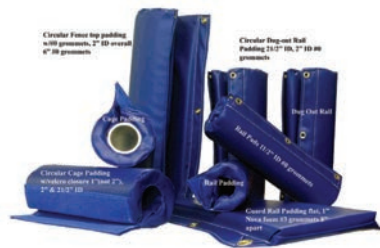

“ Just a brief note to inform you of the pleasure I’ve had working with the C&H crew at our new stadium in Holly Springs. Robert, David and Steve were not only craftsmen at their jobs, but were always friendly and made time to answer any questions or suggestions I might have for the padding and netting being installed. Our maintenance supervisor will be keeping the C&H catalog for future reference in maintaining the stadium for any new products we may need along the way. ”

Len Bradley
Town of Holly Springs, NC

Cage frame padding is made from 1” high density foam wrapped in an 18 oz. coated vinyl or laminated vinyl material with grommet strips on either side for attachment. Pads wrap securely around the cage and are laced or zip-tied together through the grommets. Many colors are available.

Padding for the batting cages can be purchased to pad the entire cage or sections of the cage. We also offer TUFFPAD by the box. Please call for details.

Flip Screen

Features:

C & H Baseball has designed a one of a kind soft toss screen! The curved pipe design allows the batter to hit in close proximity to the screen without fear of interference. The loose fitting net absorbs ball impact which virtually eliminates unwanted rebounds. There is nothing like it on the market.

Tuff Pad:

Tuff Pad is a great option for any padding need — cages, screens or fences. Tuff Pad fits into any budget.

Stadium Projects and Backstop Systems

#1 Supplier & Installer for Major and Minor League Ballparks since 1996

- C & H Baseball has supplied and installed more MLB, MiLB and College/University Backstops than all the other companies combined in the last 20 years.
- C & H Baseball manufactures equipment that is used in every MLB Ballpark, every Spring Training Complex and over 85% of the MiLB Ballparks.
- C & H Baseball has worked closely with the leading Architects and Structural Engineers on virtually every MLB and the vast majority of MiLB Ballparks built the last 20 years.
- C & H Baseball can provide, install and design custom wall padding, batting tunnels, foul ball poles, backstop netting, cable support systems, tarps, and field equipment.

The industry turns to C&H Baseball. Our staff is ready to help you with your new project!

Field Equipment – Wall Padding

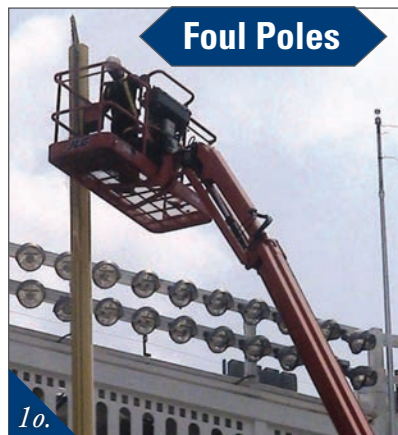

Cable Supported Backstop

Cable Supported Backstop and Over-the-top Net System

Foul Poles

BACKSTOP NETTING, BARRIER NETTING & FOUL POLES

10. FOUL POLES | ITEM #FBP100: CALL FOR CUSTOM PRICES AND ENGINEERING.

C & H Baseball's Foul Ball Poles are constructed of 6" or 8" Steel Pipe, with 1 1/2" x #9 Expanded Metal Mesh and 2" x 2" x 1/4" Steel Tubing Flag. Our Foul Ball Poles are primed and painted Safety Yellow. Steel Bolt Plate or In-Ground installation methods are available.

We also offer custom engineered/designed Foul Ball Poles... Recently, we supplied custom poles to The Baltimore Orioles Spring Training Facility (four practice fields and main stadium), Sarasota, FL; Red Sox Spring Training Facility (Six practice fields and main stadium), Ft. Myers, FL; Star Power Field, Sugarland, TX and the New Marlins Stadium, Miami, FL.

Netting-Spectra™/Dyneema

C & H Baseball can provide ANY netting type for your required stadium application:

Dyneema and Spectra are Ultra High Molecular Weight Polyethylene or "UHMWPE" fibers. Dyneema is manufactured by DSM Dyneema, B.V.; and Spectra is manufactured by Honeywell International. These fibers are the strongest on the market today and have been used in our industry for over 19 years. This type of netting comes in knotted (most widely used today) and knotless versions. The most important factor is breaking strength at the location of use. C & H Baseball uses Dyneema netting manufactured in the USA.

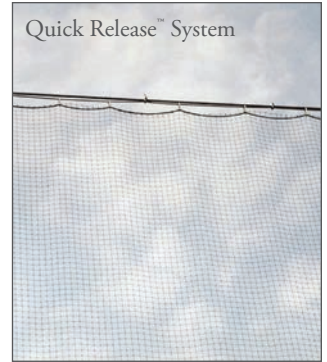

Dyneema #18 knotted with a twine thickness of 1.8mm is the number one netting currently installed in MLB and MiLB Ballparks. This thickness, 1.8mm or #18 gauge, is the only true proven netting material that lasts 6+ years in actual use.

Other notable netting types:

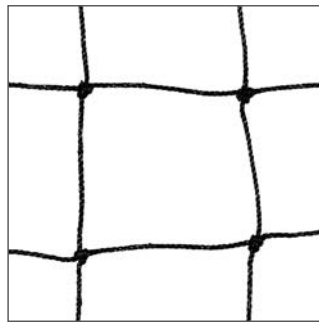

Vectran is a Liquid Crystal Polymer "LCP" manufactured by Kuraray Co., Ltd. This product has been used in Japanese stadiums with much success and durability.

Nylon is a synthetic polymer developed by Dupont. Nylon netting uses include barrier netting, dugout rail netting, batting tunnels, screen netting and little league or high school backstops. C & H Baseball's nylon net is manufactured from UV stabilized nylon materials in the USA. Many gauge sizes are available and the typical baseball/softball size is 1 3/4" x 1 3/4" square mesh, hung on the square as opposed to the diamond.

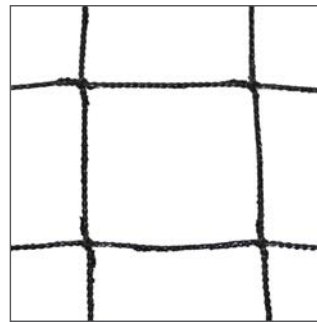

Let our experts work with you to ensure the correct netting is used for the right application in your stadium.

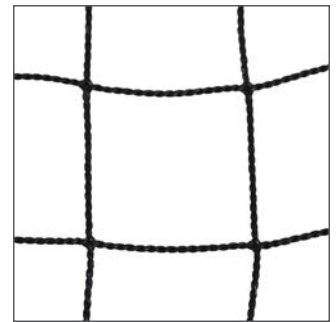

Knotted #18 Dyneema

Knotted #12 Dyneema

Knotless 1.2mm Dyneema

Knotless 1.2 Vectran

NETTING

1p. **NYLON TWINE | ITEM #MIS400**

#30 gauge tar-treated lacing twine – 1 lb. roll (approx. 500 l.f.)

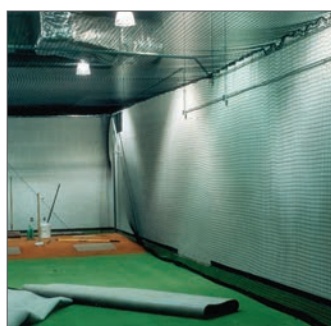

- Heavy Duty Twine for Net assembly, repair and installation
- Use to attach padding to cages, screens and rails
- Available in various strengths – most used is #36

Call For Details

Batting Tunnel Installation Kits

- ¼" cable w/fittings, net is attached using Zinc plated snap rings
- Indoor or outdoor installation kits
- Outdoor cages are supported using 2" schedule 40 galvanized steel posts
- Each kit is unique to your tunnel

Batting Tunnel Netting

C & H Baseball's batting tunnel netting is manufactured from a UV stabilized heavy duty knotted nylon material manufactured in the USA. With a 1 ¾" x 1 ¾" square mesh size, we use a black poly roped border to frame the tunnel net. We custom make each batting tunnel to assure that you have the most precisely measured tunnel on the market. Call today for your custom quote.

Batting Tunnel Support Structure

Our support structure is a unique design using 2" schedule 40 galvanized steel poles and galvanized aircraft cable. The system is designed to minimize the number of support poles needed around the batting tunnel. This in turn reduces the opportunity for baseballs to ricochet off of the poles during batting practice, potentially injuring a player. These supports can be mounted onto a concrete slab, or installed in the ground. If the tunnel area is enclosed, such as inside a building, pavilion or underneath concrete bleachers, we offer a cable and bracket design for installation.

NETTING / BATTING TUNNELS

1q. BATTING TUNNEL NETTING | ITEM #BTN100

- UV Treated Nylon Netting used: Typically #36
- Rope in borders and center line of roof
- One door typically in each tunnel. More doors available

1r. BATTING TUNNEL SUPPORT STRUCTURE | ITEM #BTN200

- Each structure is designed to your unique needs
- Ends of structure offer extra support
- Welded tabs and base plates for easy assembly

C & H Baseball offers full installation services.

Please call to discuss your needs.

Full Field Tarps/Mound Tarps/Home Plate Tarps/Base Tarps

C & H Baseball offers two types of material for infield tarps; Poly and Vinyl. There are three different weights for the poly material tarps: 6.0 oz White/Silver, 6.8 oz White/Black and 7.5 oz White/Blue. All tarps are custom made and constructed with reinforced edges and handles. Standard sizes are listed below or you can call us for your custom size needs.

6 oz Poly

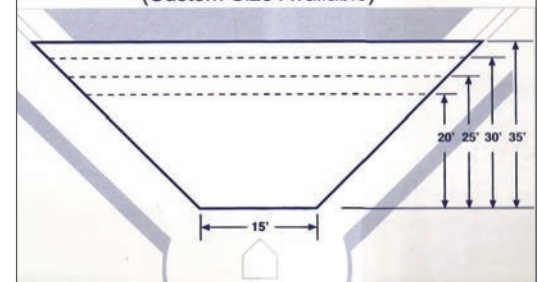

10 oz Vinyl

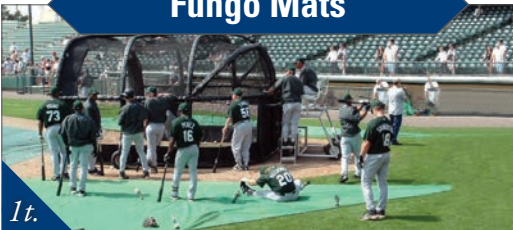

Tarp Roller

Batting Practice Turf Protectors (Custom Size Available)

C & H Baseball's Infield BP Protectors (called "Fungo Mats") are constructed of vinyl coated polyethylene material and have been used in stadiums throughout the country. Many colors are available and most are custom made to your field's specifications. Please call us today for more information.

Dry Line Markers

Team Benches

“It has truly been a pleasure working with C & H Baseball for the entire duration of my coaching career at Walsh Jesuit Baseball. They are very well respected amidst the national coaching community. Their products stand the test of time. They are honorable, trustworthy, and they put the long term needs of their customers first. We have been exclusively loyal to C & H for many years because of their commitment to quality, integrity, service, and their attention to detail. Please consider this my highest recommendation that you consider their products for your baseball and player-safety needs.”
